

Florida Restoration Area

Draft Phase V.4 Florida Coastal Access Project – Dickerson Bay Addition (preferred)

April 2022

PROJECT DESCRIPTION

The fourth phase of the Florida Coastal Access Project continues restoration planning begun during Early Restoration. The preferred alternative consists of the acquisition of an approximately 114-acre coastal parcel in Wakulla County. The purchase of the parcel would be achieved via a partnership between the Florida Trustee Implementation Group and The Trust for Public Land (TPL). TPL is a non-profit organization working to create parks and protect land for the benefit of the public. TPL would purchase the land on behalf of the Florida Trustee Implementation Group. The property would then be donated to St. Marks National Wildlife Refuge and managed as such. The Refuge would conduct minor restoration and recreational enhancements on the parcel. The Florida Department of Environmental Protection and the U.S. Department of the Interior would be the Implementing Trustees for this project.

RESTORATION TYPE

Provide and Enhance Recreational Opportunities

ESTIMATED COST

\$685,000
